Sofia Vaz (92960), Eduardo Cruz (93088) - GROUP 6

PEI 20/21: Prof. José Rafael, Prof. Osvaldo Pacheco, Prof. José Vieira, Prof. Cláudio Teixeira

Mentors: Prof. João Paulo Barraca, Prof. Cláudio Teixeira

PRODUCT

What is Eventos.UA?

Online platform

Accessible platform to gather all the event's information

Organize events

Create, manage and attend events with one app

Resources

Django, PostgreSQL, Docker and additional API's

OPPORTUNITY

WebApp

Lack of a centralized information system.

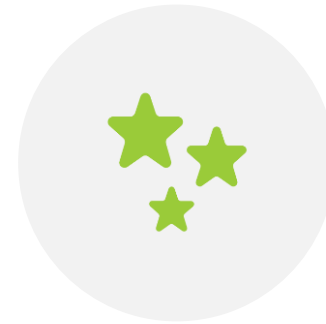

Lack of knowledge

Those who intend to attend events may miss details or even events.

Outdated model

Manual advertisement through email, social media and flyers around the University campus

Feedback

There's currently no feedback system for events organized by the university.

Hard to locate

Due to the campus complexity most people end up lost trying to find the event's facilities.

GOALS

What are the goals for **Eventos.UA**?

The objective is to develop an **WebApp** and **Mobile App** that are:

EASY

Intuitive interface suitable for everyone.

QUICKER

Having all the information in one platform makes the communication faster between event organizers and attendees.

EFFICIENT

Effective way to spread information, increasing event popularity.

TASKS

How will the project grow?

First Phase

- Solve WebApp's old issues by priority
- Plan out what functional features the Mobile App needs

Second Phase

- Add new and useful features to the WebApp
- Make the Mobile App functional

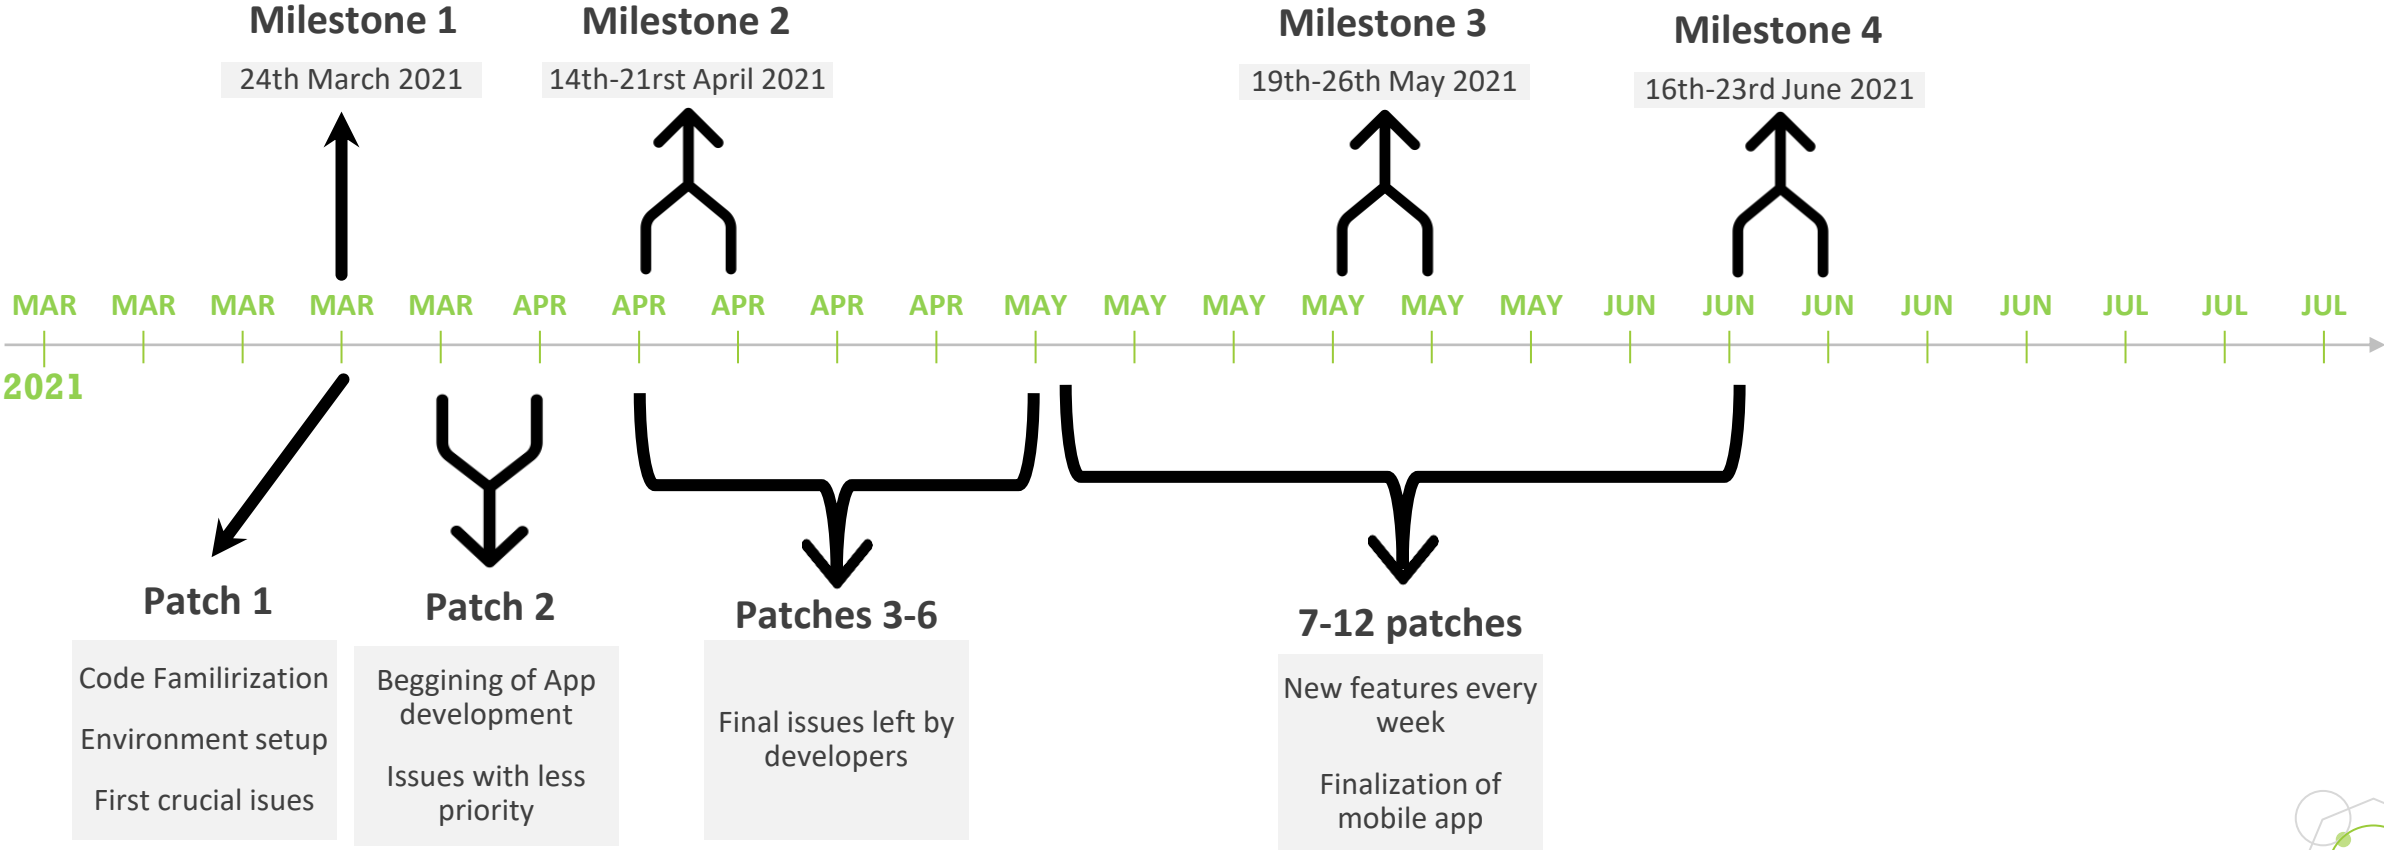

Third Phase

- Polish the WebApp and Mobile App
- Release to public

EXPECTED RESULTS

The action plan

Thank you

"An informed campus is an active campus"
